

Food safety never tasted so good

Allergens & Calories

We know it isn't the most exciting part of planning your wedding meal, but checking your guests can eat with confidence, will not only help them enjoy your wedding, it will give you peace of mind as well.

We want everyone to truly enjoy the food they eat at our venue, and we know how critical it is that we get food safety right. We take it extremely seriously and understand all the rules and advice for allergy-safe food preparation.

We put this into practice every time we set foot in our kitchens.

Our chefs and servers are not just talented professionals; they also understand the importance of providing your nearest and dearest food that tastes great and is safely prepared.

You may already know which of your guests has a food allergy, but we recommend you ask this question during the invite process. Once you have the information to hand and have chosen your menu, this easy-to-use guide will allow you to quickly identify food or drink items that may present a problem for any of your guests.

All of the dishes and drinks in our brochure and the drinks we serve from our bars are listed in this guide, with a handy contents page to help direct you to the right place. If you come across an item you want to include in your menu that contains an allergen, let us know, and we will aim to amend it or provide an alternative where we can.

If your menu or drinks have changes to those listed in the brochure or we have arranged entirely new dishes or cocktails, be sure to ask our events team so we can provide you with the correct allergen information.

This document also displays each dish's calories (kcal) in brackets next to the item. It is now a legal requirement for businesses to display calorie information on menus to help people make healthier choices when eating out.

Adults need around 2000 kcal a day.

Key to allergens

By law, there are 14 allergens that we must outline as ingredients. These are the most common allergies, and the key below shows what symbol you'll see when an allergen is present in a dish. If the allergen is not present you will see an 'x' in the allergen-specific column of the table.

For our drinks menu, we have split gluten into three separate allergens.

If your guests have an allergy not listed in the 14 main allergens, please get in touch with us directly for more information.
